

STRIPES & DECALS

INSTALLATION INSTRUCTIONS

Before we start, we would like to take this opportunity to thank you for your purchase. We sincerely appreciate the business and support. Upon first unpacking your new TOUGE NATION stripes you may notice that the stripes appear to have creases from being rolled up. Do not be alarmed...this is normal. The vinyl is perfectly fine! The creases you see are a symptom of differing material tensions between the vinyl backing paper and top sheet application paper. When you cut out the stripe sections and remove the application paper with the vinyl attached from the backing paper it will become apparent that the vinyl will lay perfectly when using the instructions provided below.

IMPORTANT: If you choose to install you stripes later, it is important that you store your stripes in a clean and dry location. Ensure that the stripes are placed back inside the bag and box supplied. Failure to do so may lead to dust entering the channels created by sheets being rolled up which may contaminate and compromise the vinyl glue surface.

Installing your decals can be intimidating at first, but if you take your time and follow a few key steps you will find that it really is not that hard and when you are all done you can stand back and marvel at your work. The instructions below detail a "wet" install. Just like it sounds we are going to use water with a tiny amount of dish soap to temporarily prevent the decal from sticking while we position it on the car.

Tools needed:

1. Hobby knife or razor blade
2. Squeegee (A credit or ATM card will work just fine!)
3. Tape measure / Ruler
4. Masking tape
5. Spray bottle full of water (we usually fill the bottle with water and add a drop of dish soap)
6. A roll of paper towel

Step 1:
Clean the vehicle surface thoroughly. If you have recently waxed your car or used a silicone product like Armor All you will need to make sure it has been removed completely.

Step 2:
Unpack your stripe package and carefully cut each panel section out. It is handy to write on the application paper which panel section goes where on the car (eg: Qtr-Panel, Fuel Door, Front Fender etc.)

Step 3:
Lay a line of masking tape down the length of the car where the stripe decal edge is to butt against. It does not matter if this edge is top or bottom. This edge will ensure that each panel section decal is correctly aligned.

Step 4:
Select a panel section to work from, it's easier to work front to rear as you tend to visualise the stripe as you install it. Wet the panel down with the water solution. Peel the backing paper and generously spray adhesive side of vinyl with water / soap solution.

Step 5:

Place on the vehicle carefully and position. The water / soap mix will give you time to position and align with your mask edge.

Step 6:

Firmly squeegee vinyl in place, working from centre out being careful not to move the decal from its position. Blot excess water with paper towel.

Step 7:

Spray the application tape (the translucent top cover that is keeping the decal together) with water to loosen and let sit for 5 minutes.

Step 8:

Carefully peel back masking / transfer tape, keeping it flat with the surface so you do not peel up the fresh vinyl. Go very slowly and carefully!

Step 9:

Trim extra overlap along edges and panel gaps with razor blade if needed. Do **NOT** attempt to fold panel edges around the the corner of the panel. Laminated decals are not designed for this and it will only lead to continuous lifting of the vinyl and possible damage. Bubbles can be carefully popped with a needle or corner of razor blade.

Step 10:

Let it dry thoroughly before driving the vehicle. Do **NOT** under any circumstances use any assisted form of drying like a heat gun or hair dryer. Do no wash for several days and avoid power washing the decal itself.

For more help, we strongly advise consulting YouTube. There are many videos online demonstrating what we mention above. One excellent example (not our video) is this - <https://www.youtube.com/watch?v=bXCmTtdFvcl>

We need your help! Please share your Touge Nation purchase experience. We would love to see your new decal installation. Please email images of your vehicle with our decals to the email below. If you post to your social media page please feel free to share with our pages below.
